NAI Tech Products Forms a Strategic Alliance with TomTec To Expand Technical Services in the US

AUBURN, California and, UNTERSCHLEISSHEIM, Germany (March 1, 2005) - NAI Tech Products, a leading manufacturer of DICOM network connectivity solutions, digital imaging components, technical field support services and PACS accessories, and TomTec Imaging Systems GmbH a leader in image management, 2D, 3D/4D visualization software for ultrasound applications have announced that the companies have entered into a strategic technical services agreement.

Under the terms of the agreement NAI will become the US technical support service provider for TomTec. NAI has established a toll-free TomTec service hotline 1-888 4TOMTEC (486-6832) staffed M-F 9AM – 8PM (EST) with emergency after hour support as needed. NAI will expand its existing technical support center to provide on-site installations, clinical applications, and post installation clinical and technical support services from its Auburn, California call center. NAI will also provide in warranty and after warranty product support for previously installed TomTec products.

"We are looking forward to this new partnership with NAI, " said Frank Schlauf, TomTec vice president of sales and marketing. "NAI has a strong track record for providing its own customers with excellent product support and technical services. It is exactly the kind of service organization which TomTec would build for itself in the US. Through this new agreement TomTec can leverage NAI's existing service and support capabilities and move ahead with product sales confident that users of TomTec products will receive the best support available. With NAI we can offer the combined advantages of superior product and technical services which have not been provided in the market previously."

TomTec is a pioneer in the development of 3D and 4D imaging tools for ultrasound and echo cardiology applications. Its products are distributed worldwide and incorporated on a number of manufacturers' ultrasound systems. TomTec's Image Arena software

provides a comprehensive image management solution for ultrasound and its recently introduced Research Arena supports a wide range of unique quantitative analysis and visualization tools supporting clinical research applications in ultrasound.

"NAI has been expanding its technical service capabilities to include support of non –NAI products." explained Paul Dempster, vice president and general manager of NAI Tech Products. "TomTec is an ideal fit for our organization having outstanding software products which are well accepted in the ultrasound and cardiology market. TomTec can significantly expand its sales in the US by having a strong product support organization and I am confident that NAI will satisfy TomTec's customers' support needs."

NAI Tech Products is a leader in DICOM connectivity solutions and a global supplier to manufacturers of diagnostic imaging equipment, PACS and distributors of conventional and digital imaging solutions. More than 6000 of their DICOM box® connectivity systems are installed worldwide. Recently, NAI Tech recently introduced a line of medical DVD recorders, the MDR®. The new system allows any modality to capture dynamic image series to a CD or DVD in DICOM format, and is ideal for portable applications such as ultrasound and mobile C-arms as well as digital receptor imaging and CR computed radiography.
