**NAI TECHNOLOGY PRODUCTS ANNOUNCES DISTRIBUTION AGREEMENT WITH
DIAGNOSTIC IMAGING**

AUBURN, CALIF. — NAI Technology Products, a division of North American Imaging, Inc., finalized a distribution agreement with Diagnostic Imaging (DI) in which NAI's network interface, the DICOM box[®], will be included in the majority of DI's medical network projects.

The distribution agreement authorizes DI to distribute NAI's connectivity products through its regional offices. Various DI branch offices have already incorporated NAI's DICOM box on a variety of print network, teleradiology and PACS installations.

"We are excited to have the marketing power of DI as a strategic partner in the distribution of the DICOM box," says Paul Dempster, general manager, NAI Technology Products. "We look forward to a long-term relationship that benefits DI's customers and expands NAI's installed base. The DICOM box integrates older imaging equipment and modalities with the latest laser cameras, diagnostic workstations and archive products, thus maximizing the benefits and return on investment to customers."

"The DICOM box was selected as our primary connectivity solution because of its high image quality, ease of installation and strong features, which integrate well with our other products," stated George Treiber, DI's director, Electronic Medical Imaging. "NAI is providing a comprehensive training program and in-field support services to ensure Diagnostic Imaging's success with the product. The agreement formalizes the partnership between the two companies and will help DI standardize its network solutions nationwide."

For more information on the DICOM box, contact NAI Technology Products, Auburn, California, 800-288-8823, www.dicombox.com.
